Subject : VIAVI Certifier10G/40G™ Approval

Dear Ed,

Schneider Electric is pleased to announce the approval of the Certifier 10G/40G. This approval is based upon evaluation of the Certifier10G/40G™ versus network analyzer by our internal laboratory.

Certifier40G™ is approved for use in both Permanent Link and Channel certification testing with all of our Category 6A/Class EA, Category 6/Class E and Category 5e/Class D system warranties.

The following configuration of Certifier10G/40G™ is required.

NGC500-6A-NA/ NGC4500-FA software version 6.xor higher
Certifier Reporter software version 6.x.x or higher

Channel testing for Category 6 A/Class EA, Category 6/Class E and Category 5e/Class D	NGC4500-6ACH2 – pair of CAT 6 A channel adapters
Permanent Link testing for Category 6A/Class EA, Category 6/Class E and Category 5e/Class D	NGC4500-6ALKIT2 – testing kit of CAT 6A permanent-links

We look forward to a continued cooperation and future opportunities to evaluate VIAVI products that can be used to test and certify our cabling installations on the field.

Sincerely Regards,

Sébastien Vitrant
